

DELIVERS THE COMFORT, PERFORMANCE AND DURABILITY THAT ARE EXPECTED BY THE ENVIRONMENTALLY CONSCIOUS CONSUMER.

With the commitment to a “greener” world, Premier Foam’s Ecofoam family of products addresses the increasing focus on environmental sustainability.

Eco foam products are based on two innovative “green” technologies. Our unique technologies allow Premier Foam to replace a significant amount of petrochemical based polyol with natural plant based renewable materials in our formulations. In addition, our new technology allows us to recycle a product that is created by normal foam manufacturing leading to a lower carbon foot print.

Ecofoam not only helps conserve scarce natural resources but delivers the comfort, performance and durability that is expected by the ENVIRONMENTALLY sensitive consumer.
